

Date
Friday 6th July 2018

Time
Registration: 8.30am
Course: 9am-5pm

Venue
ADA House
54-58 Havelock St West Perth

Fee (inc gst)
\$605.00
(Includes morn/aft tea & lunch)

Convenor
Dr Jenny Ball

CPD Hours: 6.5

Course Outline:

Through the restoration of heavily broken down teeth and replacement of lost teeth in worn dentition, prosthodontic rehabilitation aims to restore form, function and aesthetics and bring about relative stability of dental arches. Rehabilitative strategies may range from the mainstay of conventional fixed and removable prosthodontics to an increasing trend of adhesive techniques. It is important to note that there is no absolute stability under hostile oral conditions. Hence, it is crucial to identify, control and eliminate (if possible) the aetiological factors that may have resulted in the predicament in the first place, as this may help to prolong the success and survival of restored dentition. This course is designed to provide a better understanding in the identification of aetiological factors, diagnosis and treatment planning with various management approaches (including digital CAD/CAM technology use) available in the management of worn dentition cases.

Key topics to be covered:

- Types of tooth wear and aetiological factors:
 - Physiological vs. pathological wear.
 - Attrition, Abrasion, Abfraction, Erosion, Congenital tooth disorders.
- Treatment approach:
 - Remineralisation techniques.
 - Dentine bonding agents and direct composites.
 - Prosthodontic rehabilitation:
 - ◆ Determination of the amount of interarch prosthetic space available.

- ◆ Assessment of the adequacy of retention and resistance form.
- ◆ Conformative vs. reorganised approach.
- ◆ Treatment modalities for different wear distribution – localised or generalised wear.
- ◆ Choice of appropriate OVD and occlusal scheme.
- ◆ Choice of restorative materials.
- ◆ Conventional vs adhesive techniques.
- ◆ Maintenance of prosthodontic rehabilitation.

- Case Illustrations.

About the Presenter:

Dr Janice Kan graduated from her Bachelor of Dental Science (Hons) degree at the University of Western Australia in 2001. She completed her Doctor of Clinical Dentistry (Prosthodontics) degree at the University of Melbourne in 2011 and has since commenced her private specialist practice in Perth. With keen interest in dental implant biomechanics, her research has been published in a respected international dental journal and clinical textbook. She has presented at various local, national and international dental seminars and conferences. Besides clinical practice, she remains active as the Adjunct Senior Clinical Lecturer (UWA), a Fellow of the International Team of Implantology (ITI) and the Academy of Dentistry International (ADI), a founder of the Women in Dentistry Society (WA) and is currently the President of the Academy of Australian and New Zealand Prosthodontists (AANZP).
